

Acute Inpatient Clinical Psychologist

Kedren seeks California Licensed Clinical Psychologist to conduct diagnostic testing and psychological assessments, individual, family and group psychotherapy, treatment plan development and implementation, co-coordination of care and other related activities.

Experience working with adults with acute mental illness and Co-Occurring substance abuse disorders required. Familiarity with CMS standards relevant to acute inpatient and outpatient psychological services. Position is primarily direct in which contact with patients, families and other professionals is continuous.

Oral and written reporting is required daily at a level appropriate to the professional practice of psychology.

Specific requirements:

- Ability to initiate a therapeutic report with a wide range of patient populations and families
- Ability to work effectively on multi-disciplinary teams and lead team meetings and provide formal and informal staff education.

MINIMUM QUALIFICATIONS REQUIRED FOR THIS POSITION:

- A Doctorate degree from an accredited college or university with specialization in a field of psychology.
- A valid psychology license granted by the California Board of Psychology
